➤ Admin: [Business Analyst]

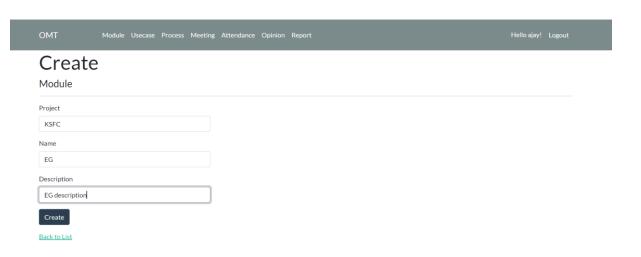

• Responsible to create model.

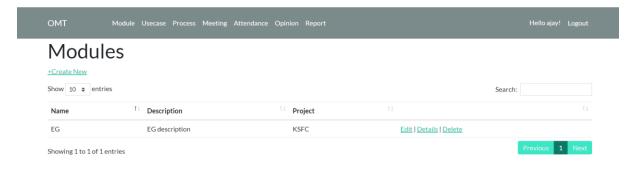

Welcome

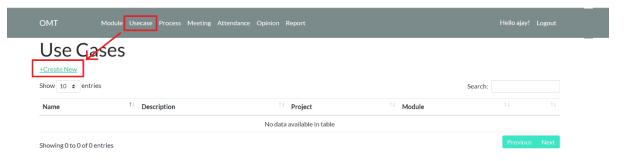

Responsible to create module.

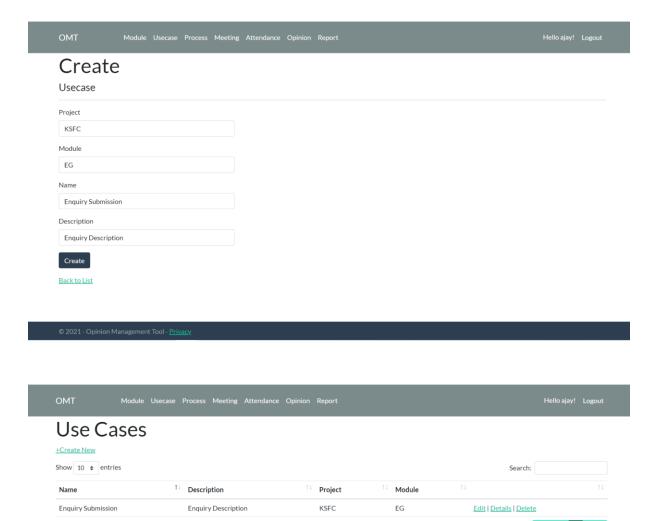

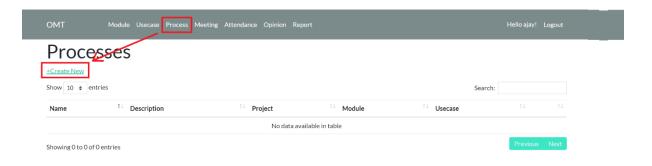

• Responsible to create Use case.

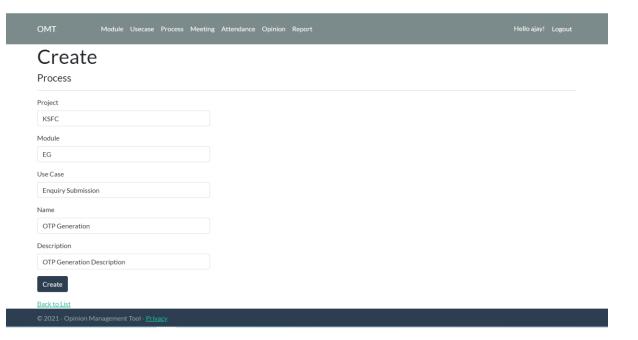

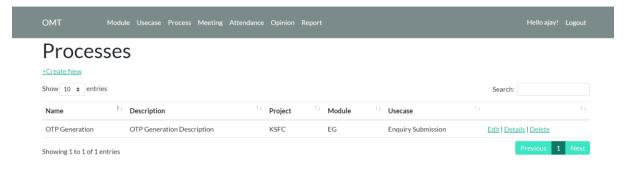

Showing 1 to 1 of 1 entries

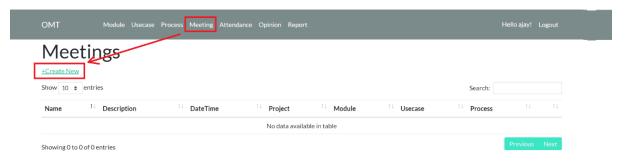

Responsible to create process.

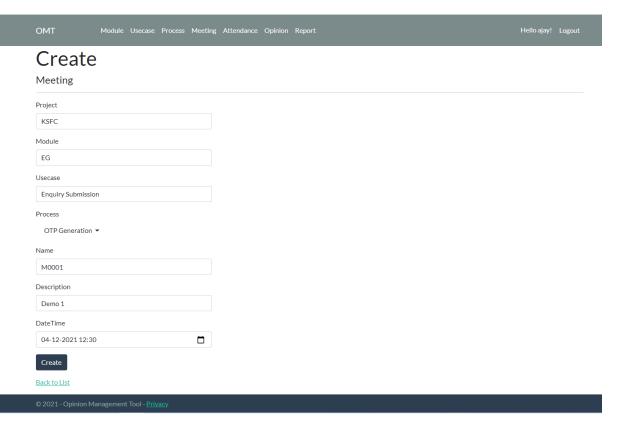

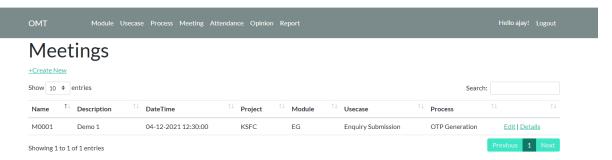

• Responsible to schedule the meetings.

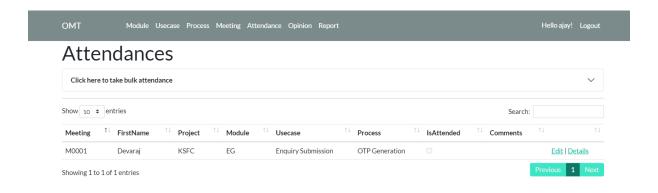

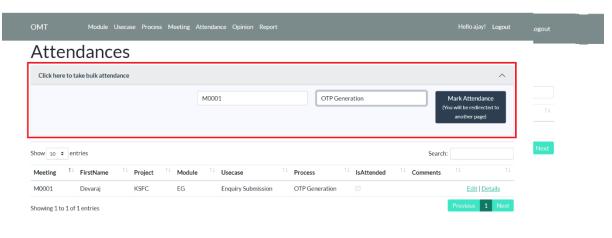

- Once meeting is created, meeting details will be sent through email to the users who are assigned under that project.
- Once meeting is created, attendance records will be created automatically based on users and process.

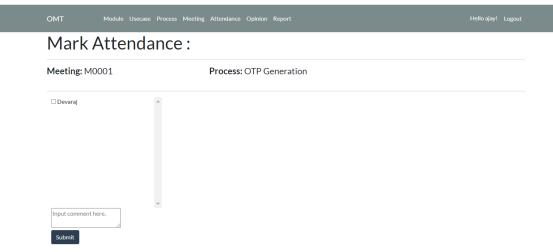

• In this created attendance list, admin can mark attended candidates as attended individually.

 Provision is given to take bulk attendance at a time by clicking Mark Attendance button based on meeting name and process name.

• After taking attendance, column **isAttended** will be checked for the attended candidates.

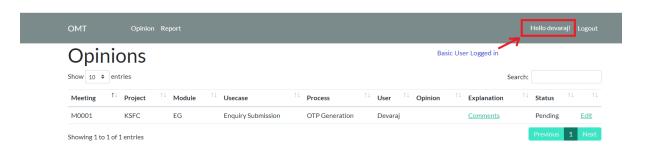

© 2021 - Opinion Management Tool - Privacy

 Once attendance is taken, an opinion record will be created automatically for the attended candidates.

• An opinion record will be created for attended candidates, where they can login and input the feedback for the created opinion by mentioning the status agree/disagree.

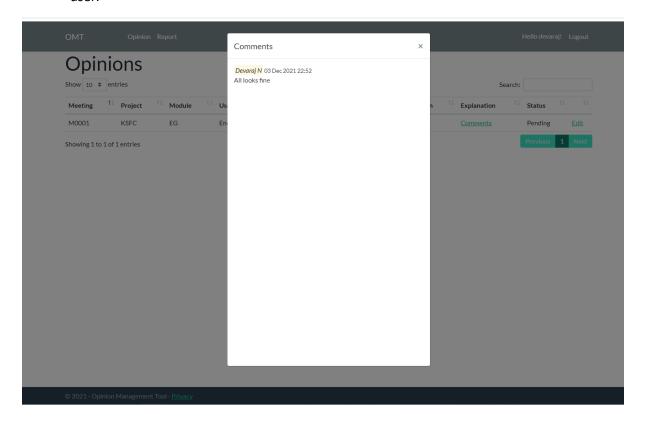

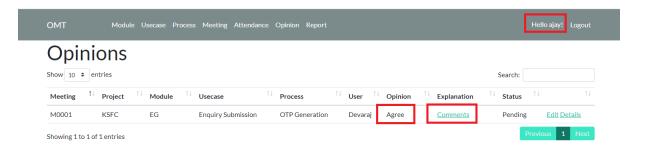

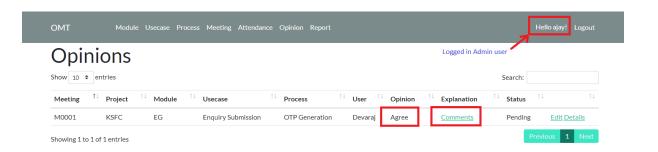

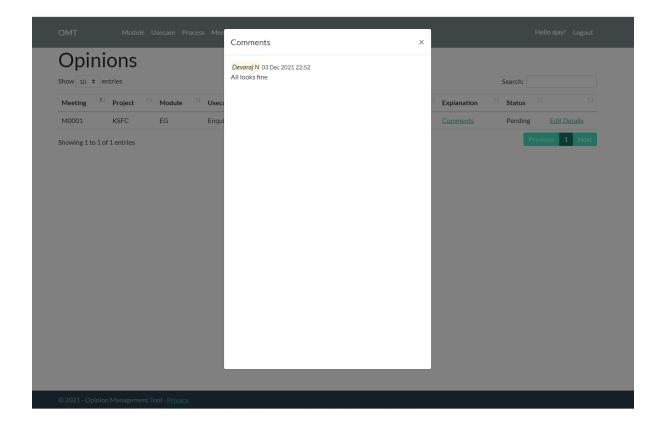

• The comments will be displayed to admin (Business Analyst) and to the comments added user.

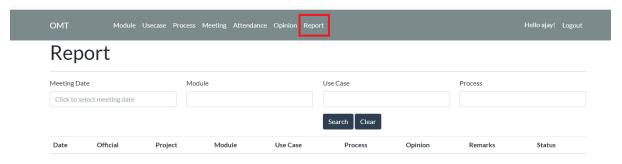

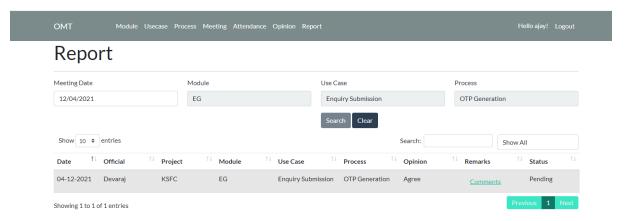

• Report can be generated to check scheduled meetings based on meeting date, module, use case, process selection and click on search button.

➤ Moderator: [Client-side admin]

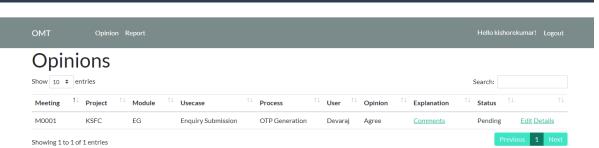

- Moderator is responsible to verify the opinions and close it.
- Since opinion close status option is not available for any user except moderator.
- Only **pending** and **in discussion** status option is available for Business analyst.
- Report provision is available for moderator to generate and verify.
